

FAST 30260 XR-1A LS-STYLE HIGH-OUTPUT COIL Fact Sheet – www.efisupply.com

- Designed For N/A, Boosted, or Nitrous Applications Making Upwards of 1000 HP
- Coils Functions in Very High Horsepower Applications Beyond What OEM Coils Can Support
- Ideal For High-Compression Naturally Aspirated, Boosted & Nitrous-Equipped Engines
- Provides Spark Energy Comparable to CDI Systems w/out a CD Ignition
- Smart Coil Design Requires No Ignitor Module

The FAST™ XR-1A LS-Style High-Output Ignition Coil is designed specifically for high-compression naturally aspirated, boosted or nitrous-equipped applications making more than 1,000 horsepower. This horsepower range is far beyond the capabilities of OEM coils. The spark energy of the FAST™ coils is comparable to CDI (capacitive discharge ignition) systems without the need to convert. The Smart Coil design also requires no ignitor module. FAST™ XR-1A LS-Style High-Output Ignition Coils delivers up to 44,000 volts, 103mJ of energy, and supports a maximum of 19 amps of current and 17 volts. It is designed to work with all OEM equipment, as well as FAST™ products that support coil-near-plug applications such as the XIM™ and EZ-LS™ ignition controllers.

Available individually or in a set of 8. Set of 8 w/ connectors is also available
