

Introducing the all new LED Light Bar from Holley EFI. The days of low oil dummy lights are behind us! This LED display will revolutionize the way you think about shift lights, and warning indicators. The Holley EFI LED Light Bar features 14 LED's that are fully programmable. Using the Holley stand-alone digital dash or Holley EFI digital dash, you can program the LED color, brightness and flash rates as well as user definable warning indicators for a fully customizable experience!

The Holley LED Light Bar keeps your shifts on time and allows you to diagnose any ECU Output at a glance, without removing your attention from the pavement ahead.

Features:

- 10 LED fully customizable shift light is the perfect addition to any vehicle
- 4 Perimeter LED's for user definable warning lights
- 3 programmable RPM ranges
- 15 levels of adjustable brightness
- Auto Brightness or Dimming based on ambient light
- 10 colors to choose from for easy identification
- Multiple flash rates
- Includes roll-bar and in-dash mounting kits for ease of installation
- Works w/ Stand Alone digital dash (p/n 553-109) or EFI digital dash (p/n 553-106)
